

# STATES OF MATTER – REVIEW BINGO

# CALL LIST

For each example or fact decide what state of matter it goes in.

Write the example or fact in correct state of matter box.

A Rock

Milk

Oxygen

Atoms are packed tightly together

Melting turns a solid into a \_\_\_\_\_.

Most of these are invisible.

When water is frozen it goes from a liquid to a \_\_\_\_\_.

This can be poured into a container.

The atoms can spread all around a room.

A Desk

Oil

Fog

This cannot be easily bent or broken.

When gas condenses like from clouds to rain, gas turns to \_\_\_\_\_.

We breath in Oxygen ( $O_2$ ) out Carbon Dioxide ( $CO_2$ )

This keeps its own shape.

This takes the shape of its container.

A pot on a stove can heat water so it evaporates into a \_\_\_\_\_
